Section 01
Learning to Live al Fresco
The Nordic countries, where people seem to spend a lot of time outdoors despite the generally harsher climate, are also some of the countries leading global efforts to address climate change. 3 It may be that people who are more in tune with their natural environment understand it better and value it more.
The images of Copenhageners cycling in the snow often shocks foreigners, especially those living in gentler climates. Just what motivates these biking Vikings? In fact, the
